Weeks 5 and 6 Schedule

1. The midterm exam will be on February 8, 2006. Therefore, there will be no homework assignment for February 13.

2. There will be no Matlab workshop after the midterm exam.

3. On February 15 (Wednesday) there will be no class in CAT 76. Instead, you will meet in the computer room from 9 AM to 11 AM, and do both of the two Cyber Exploration Labs on pp 248 to 250 in Nise, Experiment 4.1 and Experiment 4.2. There will be a lab write-up required by Monday February 20. (I know that Feb. 20 is Presidents’ Day, but Drexel has decided that this will not be a University holiday.)

4. The final exam is scheduled for March 24 from 3:30 to 5:30. I am considering giving a take-home exam that would be due at the time of the scheduled final. Your suggestions for the form of this take-home exam would be appreciated, but not necessarily followed. The take-home exam would likely consist of Matlab problems which could not be given in a classroom setting.
